Dear Admiral Hillenkoetter:

Thank you very much for again coming to the Armed Forces Staff College and lecturing on the subject of "The Central Intelligence Agency". Your presentation has given our students a clear description of this tremendously important phase of national security in these trying times.

The student interest and enthusiastic response has been widespread and your splendid talk has made a material contribution to our course of instruction. I hope that we may have this honor and privilege repeated for our succeeding classes.

With kind regards, I am

Sincerely,
